- We service small to medium size businesses, home offices, charitable organizations & residential home computer users.

WHAT WE CAN OFFER YOU?

SERVICES FOR CUSTOMERS

1. Network Consulting: Not sure what your company's technology needs are or what the next step is for your network? Contact us and we will take you through the entire process step by step and supply a detailed report.

2. Network Setup & Implementation: We can setup a full domain structured network according to your company's specific needs and budget, complete with domain, servers, email, web site, printing, etc.

3. Home wired & wireless router setup: We can setup a secure home network with a wireless connection for any PC that you want to have access to the internet.

4. Maintenance, Repair and Upgrades: We ensure that your business and home computers are always working properly with timely repairs and upgrades.

5. Backup Procedures and Disaster Recovery Plan: Let us setup your backup system and plan your disaster recovery procedure. We can setup automatic or manual backup procedures for all your data and transfer it to reliable tape drives, CD or DVD media or external hard drives that you can protect and secure off site.

6. Hardware & Software Purchases (New and Used): Avoid the purchasing headaches using multiple vendors! We can provide you with the necessary hardware & software you need for your computers and network. We can provide quality new and used equipment to help cut cost and still provide you with reliable computers and a secure computer and network setup. We sell many different brand names such as Dell, HP/Compaq, IBM/Lenovo, and Toshiba.

7. Proactive Computer and Network Administration: Don't wait for a disaster to happen before you act. Let us be a part of proactive and ongoing management and monitoring of your network and computers. We can increase your productivity and decrease your downtime by using our Regular Computer and Network Maintenance Plans and our Network Monitoring Services.

8. Network Monitoring: Let us monitor your network so you will be aware ahead of time of your potential critical problems before they happen. We can monitor your network and PCs at all times and let you know when they require service or if there is a hardware problem.

9. Documentation: We provide our clients with detailed documentation on every service call using our "Service Report Forms". Our technicians will record all details on all projects and problems we troubleshoot and repair for your business network or home computer.

AFFORDABILITY!

YES! YOU CAN AFFORD US!

We believe we can offer our business clients and home PC users the best competitive rates out there for this type of service. Compared to most I.T. servicing companies we cut our clients cost in half. Try our services and see! Your goal is our goal. We will help you stay within your budget. Call us and get your free quote today.

RATES AND PRICING

Please call us for our service rates and product pricing. We offer our services & products on both contract and hourly basis. Each client is different to us, with different technology needs. By calling us directly we can better understand your service requirements so that you get the best price possible for your company or organization.

- Simple client service agreements are used to ensure that we deliver the services we said we would deliver.
- Special rates are offered per client contract. Signed up with us and we will ensure you an even better rate than you would expect.
- Very special rates on both new and used hardware and software.
- Special service rates for home offices clients and Residential customers. Please call us for more details.
